**Bachpan** being one of the most prominent names in the play school segment, we treat all children as per their uniqueness and speciality. We recognize that children whose basic emotional, social, spiritual and physical needs are met and nurtured through the pre-school years, become ready and eager for further academics in the formal school. Consequently, we make age-appropriate material available in such a way that they learn while they are playing. The curriculum for each age level is based on thematic lessons. It is developed for every child to experience success.
